

POWERDIVE equipment is now available through the exclusive distributor – **ACRONAUTIC LIMITED**

These easy to use diving systems do not require any license and are ideally suited as a leisure item for guests or as a great tool onboard any vessel.

If you like snorkeling, you'll just love Powerdiving! With Power Dive's free-floating PowerSnorkel or the Powerdive Double Decks snorkel, you can buddy dive to 6 metres with family and friends for more than 1 hour on the 35 amp/hr battery. There are no tanks to carry, heavy equipment to wear or refills and, after your dive, simply recharge or exchange batteries and do it all again!

Dive time on the Double Decks snorkel is only limited by the size of the battery and a standard 100 amp/hr battery can last up to 4 hours !

For below the waterline emergency detangles maintenance or retrievals the Powersnorkel and Double Decks snorkel provide a compact and affordable system to quickly achieve a variety of functions.

In the Powersnorkel, the pump and motor are housed within a floating surround which enables the Powersnorkel to above the divers on the surface enabling diving from the shore or at anchor from your boat. The Decks snorkel can be simply connected to your ships power via the provided power clips or professional installed for even greater ease of use and swift setup times.

The Powersnorkel is fantastic in any resort style diving operation, just the sheer appearance and concept of PowerDive attracts people to the product. It's bright appearance and dive flag makes it easy to see where the divers are at all times and training is minimal so inexperienced divers of all ages can be diving within minutes
